

New Product Introduction!

Heli-Max®

1SQ™ RTF and Tx-R Quadcopter

Quad rotor flying in the palm of your hand!

The 1SQ is the ultimate in fun for all pilots, from beginners to experts! It's one of the smallest and best-flying quadcopters available, but don't let its compact size fool you. This tough little machine can stand up to hard knocks and come back for more.

Four independently controlled rotor blades, combined with the three-axis gyro system, make the 1SQ so stable anyone can fly it.

Under 6" square!

Features:

- Four independently controlled rotor blades make the 1SQ incredibly easy to fly
- TAGS – Triple Axis Gyro Stabilization – provides total control in all conditions; it stabilizes all three axes, so external forces will not adversely affect performance
- Can be flown in any room, or outdoors in light winds
- Molded plastic and composite materials make the 1SQ very durable
- Available Transmitter-Ready as well as Ready-To-Fly
- Both versions come with a 1S 250mAh LiPo flight battery, USB-compatible charger and an extra set of blades

Specifications

Length: 5.7 in (145 mm)

Width: 5.7 in (145 mm)

Height: 1.37 in (35 mm)
